LAMINATE FIRST / THEN KIT

Name: ..... **Date:** .....

A board built to last a year. Print on card, laminate, then stick the hook (rough) side of a 16 mm Velcro dot on each dashed circle and the loop (soft) side on the back of every picture. The six tiles at the bottom are the start of your symbol library: draw one reward on each, cut them out and keep them in an envelope taped to the back of the board.

FIRST	THEN
hook dot here	hook dot here

SYMBOL TILES: DRAW ONE PICTURE ON EACH, THEN CUT OUT

Put the loop (soft) side on the tiles, not the hook side, or the tiles will catch on everything in the envelope. A strip of hook tape along the bottom edge of the board gives you somewhere to park the tiles that are not in use today.

Cut the six tiles apart on the dashed lines before laminating.
