FIRST / THEN (STACKED)

Name: ..... **Date:** .....

The same board turned upright, for a child who scans top to bottom or for a board that hangs on a wall or a lanyard. FIRST sits above THEN and the arrow shows the order. One demand only: if the work is long, break it into the smallest piece the child can finish in a minute or two.

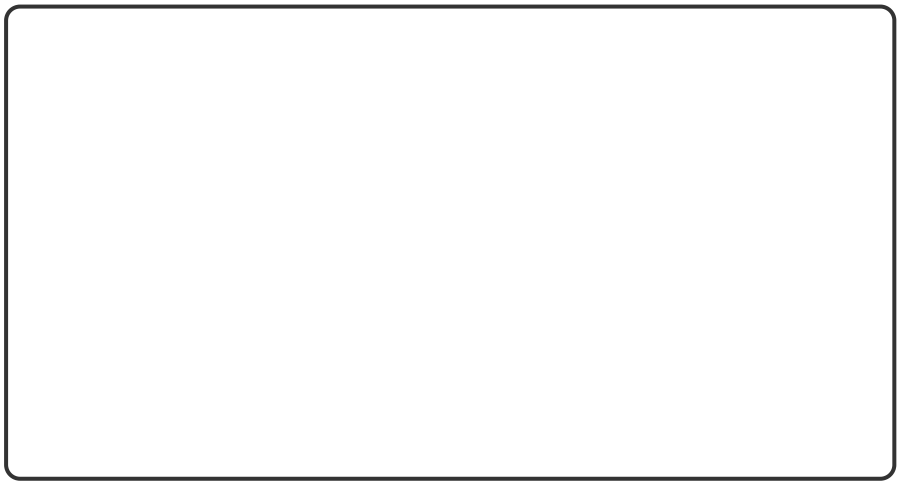

FIRST

what I have to do

THEN

what I get

Cut around the board, laminate it and punch a hole at the top for a lanyard or a hook.
