FIND THE Y WORDS

Name: ..... **Date:** .....

Read the passage out loud. There are 24 words with a y in them and 25 y letters, because mystery has two. Circle every y, then write the words into the four lists below and count each list. The four counts should add up to 25.

Last week my family tried to fly a kite in the yard. The sky was windy, and my baby sister would not stop fussing. "Why not try the hill by the city gym?" said Dad. We hurried up the muddy path and carried the kite to the top. The yellow kite shot up so high that it looked tiny. My puppy barked at it. Mom took twenty pictures. The mystery of why it fell is not solved yet, but we were all very happy.

YOUR FOUR LISTS

Consonant y how many

Long i how many

Long e how many

Short i how many

Careful with mystery: it has two y letters and they are not doing the same job. Write it in two different lists and say why.

THE FOUR LISTS

Consonant y	yard, yellow, yet	**3**
Long i	my, fly, sky, my, Why, try, by, My, why	**9**
Long e	family, windy, baby, city, muddy, tiny, puppy, twenty, mystery, very, happy	**11**
Short i	gym, mystery	**2**

Mystery is the interesting one: the first y is inside a syllable so it says short i, and the last y is at the end of a three-syllable word so it says long e. One word, two different jobs for the same letter.
