DEFINITION CARD TEMPLATE

Name: ..... **Date:** .....

The fourth card that some teachers add. It carries a small picture, the word, and a sentence saying what the part is, so an older child can match a definition to a picture after the labels are easy. Six blank cards with three ruled lines each.

One sentence is enough, and it should say where the part is or what it does rather than what it looks like. For the leaf set: "The petiole is the stalk that joins the leaf to the stem." Keep the definition cards in a second envelope and bring them out only once the picture and label matching is quick and correct.
