DRAW BOHR MODELS

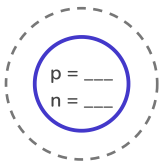

Name: ..... **Date:** .....

Part 1: for each atom, write the number of protons and neutrons in the nucleus and draw the electrons as dots on the rings. Fill the inner ring first (up to 2), then the next (up to 8). Part 2: write the electron configuration.

PART 1: COMPLETE THE MODELS

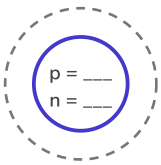

Hydrogen (H)

atomic number 1 · mass number 1

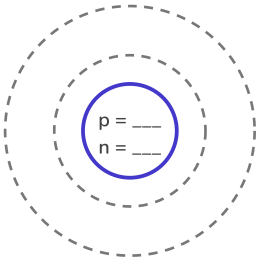

Helium (He)

atomic number 2 · mass number 4

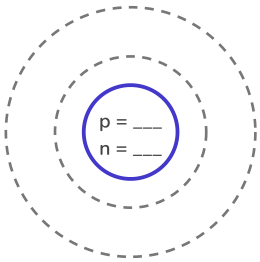

Carbon (C)

atomic number 6 · mass number 12

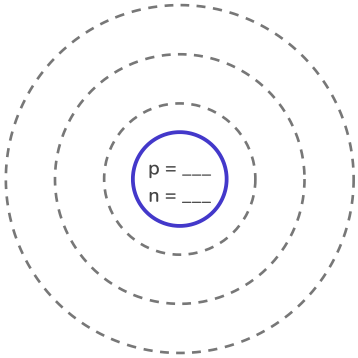

Oxygen (O)

atomic number 8 · mass number 16

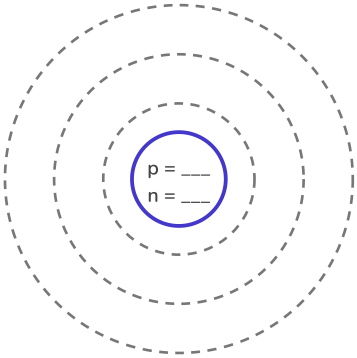

Sodium (Na)

atomic number 11 · mass number 23

Chlorine (Cl)

atomic number 17 · mass number 35

PART 2: ELECTRON CONFIGURATIONS (FOR EXAMPLE, CARBON = 2, 4)

1. Nitrogen (7 electrons): _____
2. Neon (10 electrons): _____
3. Magnesium (12 electrons): _____
4. Argon (18 electrons): _____

DRAW BOHR MODELS ANSWER KEY

Name: ..... **Date:** .....

PART 1: COMPLETE THE MODELS

Hydrogen: 1 protons, 0 neutrons, electrons 1

Helium: 2 protons, 2 neutrons, electrons 2

Carbon: 6 protons, 6 neutrons, electrons 2, 4

Oxygen: 8 protons, 8 neutrons, electrons 2, 6

Sodium: 11 protons, 12 neutrons, electrons 2, 8, 1

Chlorine: 17 protons, 18 neutrons, electrons 2, 8, 7

PART 2: ELECTRON CONFIGURATIONS (FOR EXAMPLE, CARBON = 2, 4)

1. 2, 5 2. 2, 8 3. 2, 8, 2 4. 2, 8, 8
