MOLECULES FROM MODELS

Name: ..... **Date:** .....

Part 1: use the colour key to work out which atoms are in each model. Write the chemical formula and the total number of atoms. Part 2: draw each molecule as a ball-and-stick model.

PART 1: READ THE MODELS

Key: ◯ H = hydrogen ● O = oxygen ● C = carbon ● N = nitrogen ● Cl = chlorine

Water

Formula: _____

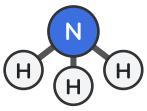

Atoms: _____

Carbon dioxide

Formula: _____

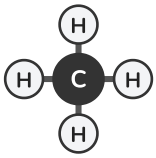

Atoms: _____

Ammonia

Formula: _____

Atoms: _____

Methane

Formula: _____

Atoms: _____

Oxygen

Formula: _____

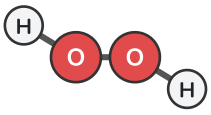

Atoms: _____

Hydrogen chloride

Formula: _____

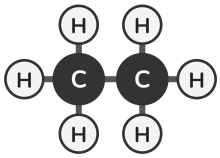

Atoms: _____

Hydrogen peroxide

Formula: _____

Atoms: _____

Ethane

Formula: _____

Atoms: _____

PART 2: DRAW THE MODELS

Hydrogen, H_2

Nitrogen, N_2

Sulfur dioxide, SO_2 (sulfur in the middle)

MOLECULES FROM MODELS ANSWER KEY

Name: ..... **Date:** .....

PART 1: READ THE MODELS

Water: H_2O, 3 atoms; Carbon dioxide: CO_2, 3 atoms; Ammonia: NH_3, 4 atoms; Methane: CH_4, 5 atoms; Oxygen: O_2, 2 atoms; Hydrogen chloride: HCl, 2 atoms; Hydrogen peroxide: H_2O_2, 4 atoms; Ethane: C_2H_6, 8 atoms

PART 2: DRAW THE MODELS

Drawings: H_2 two white balls joined by one stick; N_2 two blue balls joined by three sticks (triple bond); SO_2 a yellow ball in the middle joined to two red balls.
