Word equations

Name: _____ **Date:** _____

INSTRUCTIONS: Part 1: write each reaction as a word equation (reactants → products). Part 2: complete the table. Part 3: complete the sentences.

PART 1: WRITE THE WORD EQUATION

1. Magnesium burns in oxygen to make magnesium oxide.

   _____

2. Hydrogen and oxygen react to form water.

   _____

3. When calcium carbonate is heated it breaks down into calcium oxide and carbon dioxide.

   _____

4. Zinc reacts with hydrochloric acid to give zinc chloride and hydrogen.

   _____

5. Sodium hydroxide neutralises hydrochloric acid, forming sodium chloride and water.

   _____

6. Methane burns in oxygen to produce carbon dioxide and water.

   _____

7. Iron and sulfur are heated together and form iron sulfide.

   _____

8. Copper carbonate decomposes on heating into copper oxide and carbon dioxide.

   _____

PART 2: REACTANTS AND PRODUCTS

Equation 1. Reactants: _____ Products: _____

Equation 4. Reactants: _____ Products: _____

Equation 6. Reactants: _____ Products: _____

PART 3: COMPLETE THE SENTENCES

1. The substances on the left of the arrow are the _____.
2. The substances on the right of the arrow are the _____.
3. The arrow means "_____".
4. A + sign between two reactants means they are _____ together.

Word equations

PAGE 2 - ANSWER KEY

PART 1: WRITE THE WORD EQUATION

1. magnesium + oxygen → magnesium oxide
2. hydrogen + oxygen → water
3. calcium carbonate → calcium oxide + carbon dioxide
4. zinc + hydrochloric acid → zinc chloride + hydrogen
5. sodium hydroxide + hydrochloric acid → sodium chloride + water
6. methane + oxygen → carbon dioxide + water
7. iron + sulfur → iron sulfide
8. copper carbonate → copper oxide + carbon dioxide

PART 2: REACTANTS AND PRODUCTS

Equation 1. Reactants: magnesium, oxygen. Products: magnesium oxide

Equation 4. Reactants: zinc, hydrochloric acid. Products: zinc chloride, hydrogen

Equation 6. Reactants: methane, oxygen. Products: carbon dioxide, water

PART 3: COMPLETE THE SENTENCES

1. reactants 2. products 3. reacts to make (produces) 4. reacting (mixed)
