COMPARE AND ORDER DECIMALS

Name: ..... **Date:** .....

Compare the whole parts first. If they match, compare the tenths, then the hundredths. Adding a zero on the end (0.5 = 0.50) does not change a decimal, so line the digits up before you decide. Write <, > or =.

Worked example: 0.3 or 0.25? Write 0.3 as 0.30. Thirty hundredths is more than twenty-five hundredths, so 0.3 > 0.25. More digits does not mean a bigger number.

1. 3.51 ☐ 0.36
2. 0.5 ☐ 0.50
3. 8.27 ☐ 1.39
4. 1.35 ☐ 5.2
5. 0.3 ☐ 0.25
6. 6.12 ☐ 9.82
7. 7.06 ☐ 5.22
8. 0.9 ☐ 0.89
9. 7.37 ☐ 3.52
10. 8.78 ☐ 0.9
11. 2.07 ☐ 2.7
12. 0.56 ☐ 1.9

ORDER THE DECIMALS

13. 0.7, 0.07, 0.77, 0.17 — least to greatest: _____
14. 3.5, 3.05, 3.55, 3.15 — least to greatest: _____
15. 0.4, 0.44, 0.04, 0.41 — least to greatest: _____
16. 6.2, 5.9, 6.15, 6.02 — least to greatest: _____

COMPARE AND ORDER DECIMALS

ANSWER KEY

Name: ..... **Date:** .....

Compare the whole parts first. If they match, compare the tenths, then the hundredths. Adding a zero on the end (0.5 = 0.50) does not change a decimal, so line the digits up before you decide. Write <, > or =.

Worked example: 0.3 or 0.25? Write 0.3 as 0.30. Thirty hundredths is more than twenty-five hundredths, so 0.3 > 0.25. More digits does not mean a bigger number.

1. 3.51 > 0.36
2. 0.5 = 0.50
3. 8.27 > 1.39
4. 1.35 < 5.2
5. 0.3 > 0.25
6. 6.12 < 9.82
7. 7.06 > 5.22
8. 0.9 > 0.89
9. 7.37 > 3.52
10. 8.78 > 0.9
11. 2.07 < 2.7
12. 0.56 < 1.9

ORDER THE DECIMALS

13. 0.7, 0.07, 0.77, 0.17 — least to greatest: **0.07 < 0.17 < 0.7 < 0.77**
14. 3.5, 3.05, 3.55, 3.15 — least to greatest: **3.05 < 3.15 < 3.5 < 3.55**
15. 0.4, 0.44, 0.04, 0.41 — least to greatest: **0.04 < 0.4 < 0.41 < 0.44**
16. 6.2, 5.9, 6.15, 6.02 — least to greatest: **5.9 < 6.02 < 6.15 < 6.2**
