ADD AND SUBTRACT DECIMALS

Name: ..... **Date:** .....

Line the numbers up on the decimal point, not on the last digit. Add a zero to fill an empty hundredths place, then add or subtract as usual and put the decimal point straight down into the answer.

Worked example: 4.5 + 2.37: write 4.5 as 4.50, then 4.50 + 2.37 = **6.87**. 8.2 − 3.45: write 8.20, then 8.20 − 3.45 = **4.75** (regroup one tenth into ten hundredths).
