DECIMALS ON A NUMBER LINE AND IN WORDS

Name: ..... **Date:** .....

Each number line is cut into ten equal jumps, so every tick is one tenth. Fill in the missing labels. Then solve the word problems, showing the decimal addition or subtraction you used.

Worked example: on a line from 0 to 1 the fifth tick is 0.5, so the third tick is 0.3 and the eighth is 0.8. Between 2 and 3 the ticks are 2.1, 2.2, 2.3 and so on.

WORD PROBLEMS

1. A notebook costs $2.75 and a pen costs $1.20. How much do they cost together?

Answer:

2. Mia had $10.00. She spent $6.45 on lunch. How much money does she have left?

Answer:

3. A ribbon is 4.5 meters long. Leo cuts off 1.75 meters. How long is the ribbon now?

Answer:

4. Sam ran 2.4 km on Monday and 3.35 km on Tuesday. How far did he run in total?

Answer:

DECIMALS ON A NUMBER LINE AND IN WORDS ANSWER KEY

Name: ..... **Date:** .....

Each number line is cut into ten equal jumps, so every tick is one tenth. Fill in the missing labels. Then solve the word problems, showing the decimal addition or subtraction you used.

Worked example: on a line from 0 to 1 the fifth tick is 0.5, so the third tick is 0.3 and the eighth is 0.8. Between 2 and 3 the ticks are 2.1, 2.2, 2.3 and so on.

WORD PROBLEMS

1. A notebook costs $2.75 and a pen costs $1.20. How much do they cost together?

$2.75 + $1.20 = $3.95

2. Mia had $10.00. She spent $6.45 on lunch. How much money does she have left?

$10.00 − $6.45 = $3.55

3. A ribbon is 4.5 meters long. Leo cuts off 1.75 meters. How long is the ribbon now?

4.5 − 1.75 = 2.75 meters

4. Sam ran 2.4 km on Monday and 3.35 km on Tuesday. How far did he run in total?

2.4 + 3.35 = 5.75 km
