EIGHT CARDS TO A PAGE

Name: ..... **Date:** .....

A smaller control card, 78 by 30 mm of picture over a 78 by 12 mm label, eight to a page instead of six. Use it for short words and simple pictures, and when you want a set of twelve or more cards without printing three sheets.

The picture card for this size is the same 78 by 30 mm box with no label strip: cut one along the dashed line, lay it on the control card, and the two pictures match. Because the label strip is 12 mm rather than 15 mm, write in a smaller hand or the word will touch the cutting line. Mixing sizes inside one set is the one thing to avoid.
