READ THE REKENREK

Name: ..... **Date:** .....

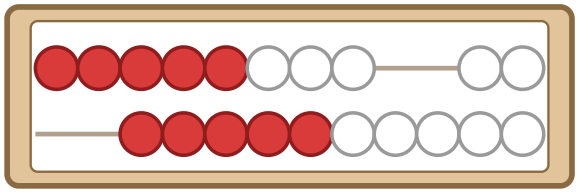

Count the beads that have been pushed to the left. Use the five red beads as a group: six is five and one more.

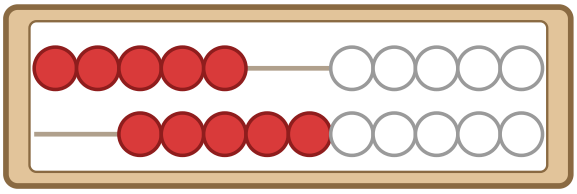

Each row has **five red beads and then five white beads**, ten in a row and twenty in all. Beads pushed to the left are the ones you are counting. Here seven are pushed: five red and two white, so you can see seven without counting one bead at a time.

1. 

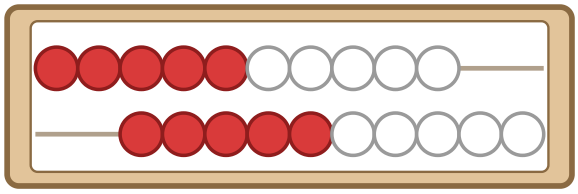

How many beads?

2. 

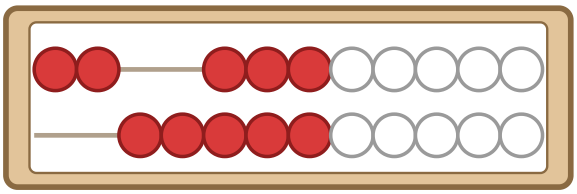

How many beads?

3. 

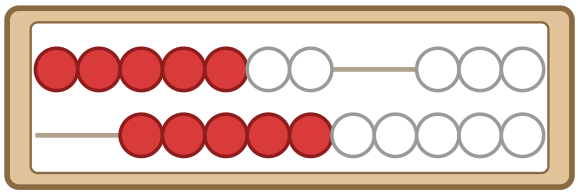

How many beads?

4. 

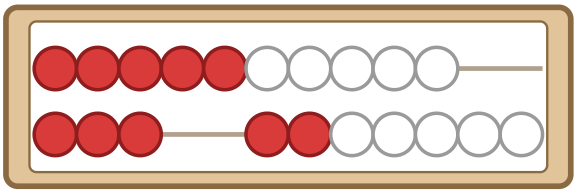

How many beads?

5. 

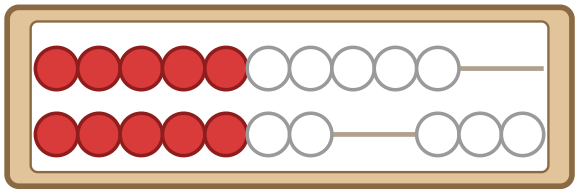

How many beads?

6. 

How many beads?

7. 

How many beads?

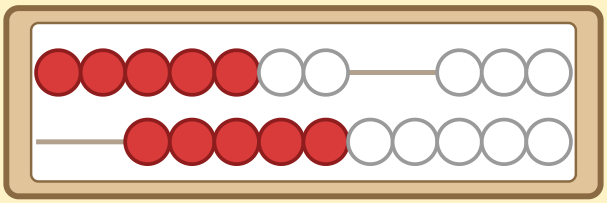

8. 

How many beads?
