LAMINATE BREAK KIT

Name: ..... **Date:** .....

A four-slot choice board plus eight tiles, so the options on offer can change without reprinting. Laminate both, stick the hook (rough) side of a 16 mm Velcro dot on each marked circle on the board, and the loop (soft) side on the back of every tile. Put today's four tiles up and keep the rest in an envelope.

TODAY I CAN CHOOSE FROM

TILES: SIX DRAWN, TWO FOR YOUR OWN

Four choices is plenty. Eight tiles on a board at once means a child in a bad moment has to scan eight pictures before they can ask for anything, which is exactly when scanning stops working.

Cut the eight tiles apart on the dashed lines, then laminate and round the corners.
