FIND THE PRIMES

Name: ..... **Date:** .....

The Sieve of Eratosthenes. Cross out 1. Circle 2, then cross out every multiple of 2. Circle 3 and cross out its multiples. Do the same for 5 and 7. Every number left is prime.

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

How many primes did you find?

Why did you not need to cross out multiples of 11?

FIND THE PRIMES ANSWER KEY

Name: ..... **Date:** .....

Crossed-out numbers are composite (or 1). The 25 highlighted numbers are the primes to 100.
Multiples of 11 were already crossed out because 11 × 11 = 121 is beyond 100.
