SHADING A STILL LIFE

Name: ..... **Date:** .....

The light comes from the top left. Shade the three fruits so they look solid and round, using the value scale and techniques you have practised.

1. **Find the highlight on each fruit (top left, nearest the light).**
2. **Shade the midtone, then darken the side away from the light into a core shadow.**
3. **Leave a thin strip of reflected light along the bottom edge.**
4. **Add a cast shadow on the table to the right of each fruit, darkest where it touches.**
