EQUIVALENT OR NOT?

Name: ..... **Date:** .....

Two fractions are equivalent when they simplify to the same fraction. Simplify both, then circle equivalent or not equivalent.

1. $\frac{2}{10}$ and $\frac{6}{15}$ — equivalent / not equivalent
2. $\frac{2}{3}$ and $\frac{4}{6}$ — equivalent / not equivalent
3. $\frac{3}{5}$ and $\frac{12}{20}$ — equivalent / not equivalent
4. $\frac{1}{2}$ and $\frac{5}{10}$ — equivalent / not equivalent
5. $\frac{8}{20}$ and $\frac{4}{10}$ — equivalent / not equivalent
6. $\frac{2}{6}$ and $\frac{5}{15}$ — equivalent / not equivalent
7. $\frac{9}{12}$ and $\frac{6}{8}$ — equivalent / not equivalent
8. $\frac{1}{3}$ and $\frac{6}{9}$ — equivalent / not equivalent
9. $\frac{4}{20}$ and $\frac{2}{10}$ — equivalent / not equivalent
10. $\frac{6}{8}$ and $\frac{8}{16}$ — equivalent / not equivalent
11. $\frac{6}{9}$ and $\frac{8}{12}$ — equivalent / not equivalent
12. $\frac{4}{12}$ and $\frac{10}{15}$ — equivalent / not equivalent

Worked example: $\frac{4}{6}$ and $\frac{10}{15}$: $\frac{4}{6} = \frac{2}{3}$ and $\frac{10}{15} = \frac{2}{3}$, so they are equivalent. $\frac{4}{6}$ and $\frac{9}{15}$ are not, because $\frac{9}{15} = \frac{3}{5}$.

EQUIVALENT OR NOT? ANSWER KEY

Name: ..... Date: .....

Two fractions are equivalent when they simplify to the same fraction. Simplify both, then circle equivalent or not equivalent.

1. $\frac{2}{10}$ and $\frac{6}{15}$ — equivalent | **not equivalent** — $\frac{1}{5} \neq \frac{2}{5}$
2. $\frac{2}{3}$ and $\frac{4}{6}$ — **equivalent** | not equivalent — $\frac{2}{3} = \frac{2}{3}$
3. $\frac{3}{5}$ and $\frac{12}{20}$ — **equivalent** | not equivalent — $\frac{3}{5} = \frac{3}{5}$
4. $\frac{1}{2}$ and $\frac{5}{10}$ — **equivalent** | not equivalent — $\frac{1}{2} = \frac{1}{2}$
5. $\frac{8}{20}$ and $\frac{4}{10}$ — **equivalent** | not equivalent — $\frac{2}{5} = \frac{2}{5}$
6. $\frac{2}{6}$ and $\frac{5}{15}$ — **equivalent** | not equivalent — $\frac{1}{3} = \frac{1}{3}$
7. $\frac{9}{12}$ and $\frac{6}{8}$ — **equivalent** | not equivalent — $\frac{3}{4} = \frac{3}{4}$
8. $\frac{1}{3}$ and $\frac{6}{9}$ — equivalent | **not equivalent** — $\frac{1}{3} \neq \frac{2}{3}$
9. $\frac{4}{20}$ and $\frac{2}{10}$ — **equivalent** | not equivalent — $\frac{1}{5} = \frac{1}{5}$
10. $\frac{6}{8}$ and $\frac{8}{16}$ — equivalent | **not equivalent** — $\frac{3}{4} \neq \frac{1}{2}$
11. $\frac{6}{9}$ and $\frac{8}{12}$ — **equivalent** | not equivalent — $\frac{2}{3} = \frac{2}{3}$
12. $\frac{4}{12}$ and $\frac{10}{15}$ — equivalent | **not equivalent** — $\frac{1}{3} \neq \frac{2}{3}$
