SUBTRACTING FRACTIONS WITH PICTURES

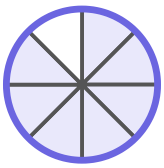

Name: ..... **Date:** .....

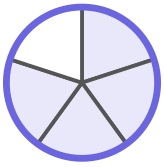

The picture shows the first fraction. Cross out the number of parts being taken away, count what is left, and write the answer in lowest terms.

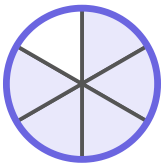

1.  $\frac{4}{5} - \frac{3}{5} = \square$

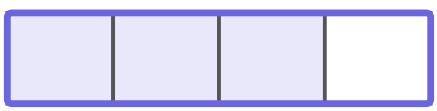

2.  $\frac{7}{8} - \frac{2}{8} = \square$

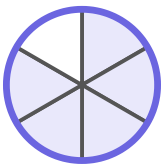

3.  $\frac{3}{4} - \frac{1}{4} = \square$

4.  $\frac{7}{8} - \frac{5}{8} = \square$

5.  $\frac{4}{5} - \frac{2}{5} = \square$

6.  $\frac{5}{6} - \frac{2}{6} = \square$

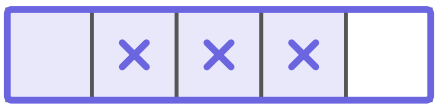

7.  $\frac{3}{4} - \frac{2}{4} = \square$

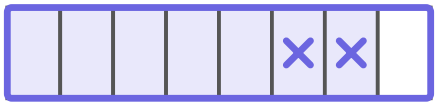

8.  $\frac{5}{6} - \frac{3}{6} = \square$

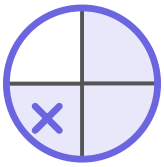

SUBTRACTING FRACTIONS WITH PICTURES ANSWER KEY

Name: ..... Date: .....

The picture shows the first fraction. Cross out the number of parts being taken away, count what is left, and write the answer in lowest terms.

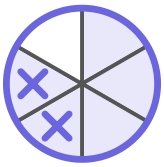

1.  $\frac{4}{5} - \frac{3}{5} = \frac{1}{5}$

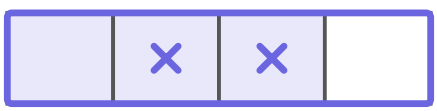

2.  $\frac{7}{8} - \frac{2}{8} = \frac{5}{8}$

3.  $\frac{3}{4} - \frac{1}{4} = \frac{1}{2}$

4.  $\frac{7}{8} - \frac{5}{8} = \frac{1}{4}$

5.  $\frac{4}{5} - \frac{2}{5} = \frac{2}{5}$

6.  $\frac{5}{6} - \frac{2}{6} = \frac{1}{2}$

7.  $\frac{3}{4} - \frac{2}{4} = \frac{1}{4}$

8.  $\frac{5}{6} - \frac{3}{6} = \frac{1}{3}$
