2-DIGIT SUBTRACTION WITH REGROUPING

Name: ..... **Date:** .....

The top ones digit is too small in every sum. Take one ten, cross it out in the box, make the ones 10 more, then subtract.

```
   6  2
 - 4  7
 ------
   1  5
```

Worked example: 2 - 7 will not work, so take a ten: 6 tens becomes 5 tens and 2 ones becomes 12 ones. 12 - 7 = 5, 5 - 4 = 1. So 62 - 47 = **15**.

40 − 21 =	70 − 37 =	70 − 39 =	85 − 56 =	86 − 57 =
64 − 38 =	91 − 24 =	67 − 39 =	50 − 27 =	61 − 34 =
92 − 25 =	94 − 57 =	83 − 59 =	94 − 75 =	74 − 48 =
61 − 48 =	90 − 46 =	83 − 39 =	55 − 27 =	51 − 32 =

2-DIGIT SUBTRACTION WITH REGROUPING ANSWER KEY

Name: ..... **Date:** .....

Answers are shown in colour. Tick each one your child got right and revisit any column that needed a second look.

40 − 21 = 19	70 − 37 = 33	70 − 39 = 31	85 − 56 = 29	86 − 57 = 29
64 − 38 = 26	91 − 24 = 67	67 − 39 = 28	50 − 27 = 23	61 − 34 = 27
92 − 25 = 67	94 − 57 = 37	83 − 59 = 24	94 − 75 = 19	74 − 48 = 26
61 − 48 = 13	90 − 46 = 44	83 − 39 = 44	55 − 27 = 28	51 − 32 = 19
