CALM-DOWN STRATEGIES

Name: ..... **Date:** .....

Twelve ways to calm a big feeling. When you notice your body getting hot, tight or wiggly, pick one and try it. If it does not work, pick another. Hang this poster in your calm-down corner or on the fridge.

Take 5 deep breaths

In through the nose, out through the mouth, slow.

Count to 10

Slowly, on your fingers. Then count back down.

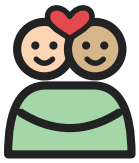

Drink some water

Small sips. Feel it cool you down.

Squeeze a ball

Squeeze tight for 5, then let go. Repeat.

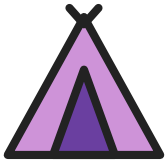

Ask for a hug

Or hug yourself: wrap your arms around tight.

Stretch your body

Reach up high, touch your toes, roll your shoulders.

Go to a quiet spot

A corner, a tent or your room. Come back when ready.

Draw or color

Scribble how you feel, or color slowly inside the lines.

Listen to music

Put on a calm song and listen all the way through.

Talk to someone

Say "I feel ... because ...". Ask for what you need.

Take a walk

Walk around the room, the yard or the hall and back.

Read a book

Pick a favorite book and read or look at the pictures.
