SOLIDS ALL AROUND US

Name: ..... **Date:** .....

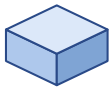

Find something in the room or the kitchen that is the shape of each solid. Draw it in the box and write its name on the line underneath.

Sphere

Cube

Cuboid

Cylinder

Cone

Square-based pyramid

IDEAS, IF YOU NEED THEM

a ball · a dice · a cereal box · a tin can · a party hat · a tent · a drinking glass · an ice cream cone · a sugar cube · a shoe box

Not everything is a perfect solid. A tin can is a very good cylinder, but a ball of dough is only roughly a sphere. If the object is close but not exact, write what is different underneath.
