BREAK REQUEST DATA

Name: ..... **Date:** .....

Ten requests in a row, with the thing that matters recorded twice: how the child asked, and what the adult did. A child who asks with the card and gets a break learns to use the card. A child who asks with the card, is told "in a minute", and then throws the pencil has learned something too.

Student ..... Dates .....

How asked: **C** handed the card · **W** used words · **P** pointed to the board · **B** behavior first (shouting, leaving, throwing).
Response: **Y** break given now · **L** given late · **N** refused.

#	TIME	WHAT WAS BEING ASKED OF THEM	HOW ASKED	RES-PONSE	MINS	BACK TO WORK?

10						

Asked with the card ..... **of 10**

Break given now ..... **of 10**

The goal is the first number going up and the B rows going down. If "break given now" is not close to ten, nothing else on this sheet will improve.
