CUT OUT THE CROWN

Name: ..... **Date:** .....

A crown in three strips: two pointed crown pieces with jewels to color and one plain back strip, each with a glue tab. Cutting the points is stop-and-turn practice with a prize at the end.

How to make the crown

1. Color the jewels and the points, then cut out the three strips along the dashed lines.
2. Glue the tab of the first crown strip to the start of the second. Glue the back strip to the end.
3. Wrap it around your head, mark where it meets and glue or tape the ends together.
