ABC AND FUNCTION

Name: ..... **Date:** .....

After each incident, circle the function the consequence most likely served. Four or five incidents pointing at the same function is the start of a hypothesis, not proof.

#	ANTECEDENT	BEHAVIOR	CONSEQUENCE	LIKELY FUNCTION Circle one
1				Escape Attention Tangible Sensory
2				Escape Attention Tangible Sensory
3				Escape Attention Tangible Sensory
4				Escape Attention Tangible Sensory
5				Escape Attention Tangible Sensory

HOW MANY OF EACH **Escape** _____ **Attention** _____ **Tangible** _____ **Sensory** _____

Escape: the behavior ended, delayed or shortened something the student did not want to do. **Attention:** it brought an adult or a peer to the student. **Tangible:** it got an item, a food or an activity. **Sensory:** it produced a feeling in the body and happened whether or not anyone responded. A behavior can serve more than one function; circle the one the consequence column supports.
