ROLL, SLIDE OR STACK

Name: ..... **Date:** .....

Try each solid on a table. Put a check mark in every column that works: some solids do only one of the three, and the cylinder does all three.

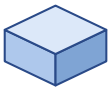

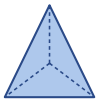

Solid	Rolls	Slides	Stacks
 **Sphere**			
 **Ovoid**			
 **Ellipsoid**			
 **Cube**			
 **Cuboid**			
 **Cylinder**			
 **Cone**			
 **Triangular prism**			
 **Square-based pyramid**			
 **Triangular-based pyramid**			

A solid rolls if a curved surface touches the table, slides if a flat face does, and stacks if another solid can sit on top of it. A cylinder rolls lying down, and slides and stacks standing up. A cone rolls on its side and slides on its circle, but nothing will balance on its point.

ROLL, SLIDE OR STACK ANSWER KEY

Name: ..... **Date:** .....

Try each solid on a table. Put a check mark in every column that works: some solids do only one of the three, and the cylinder does all three.

Solid	Rolls	Slides	Stacks
