BREATHING EXERCISES

Name: ..... **Date:** .....

Four breathing patterns drawn as shapes. Put your finger on the dot and trace the shape slowly while you breathe: the shape tells you when to breathe in, hold and breathe out. Do each one two or three times.

1. Square breathing

Breathe in for 4 counts up the side, hold for 4 across the top, breathe out for 4 down, hold for 4 along the bottom.

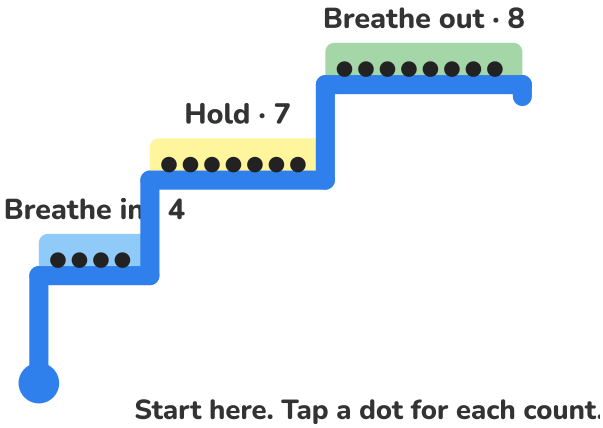

2. Star breathing

Trace the star. Every line going up is a breath in; every line going down is a breath out. Pause at each point.

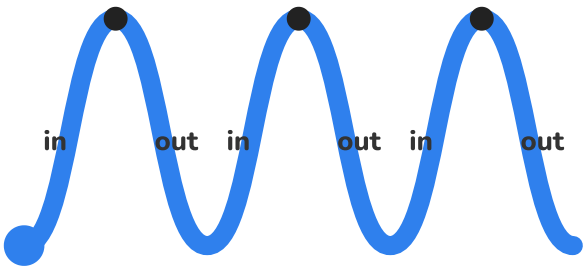

3. 4-7-8 ladder

Climb the ladder: breathe in through your nose for 4, hold for 7, then breathe out slowly through your mouth for 8. For older children.

4. Wave breathing

Ride the waves: breathe in as your finger climbs each wave and out as it comes down. Make the breath as slow as the wave.

Up = breathe in. Down = breathe out.
