WHAT CAN I DO WHEN I FEEL...

Name: ..... **Date:** .....

Every feeling shows up in the body first. Read the body clues, then look at what helps. Cross out anything that does not work for you and write your own idea on the dotted line. The last row is for a feeling of your choice.

I FEEL	MY BODY CLUES	WHAT HELPS ME
 **Angry**	Hot face, tight fists, loud voice	Take 5 deep breaths, squeeze a pillow, walk away for a minute
 **Sad**	Heavy body, tears, want to be alone	Ask for a hug, talk to someone I trust, draw how I feel
 **Scared**	Shaky, fast heart, want to hide	Hold a grown-up's hand, name 5 things I can see, say "I am safe"
 **Worried**	Butterflies in tummy, cannot stop thinking	Write or say my worry, ask a question, plan one small step
 **Frustrated**	Clenched jaw, want to give up or throw	Stop and count to 10, ask for help, try a different way
 **Excited**	Bouncy, loud, hard to wait	Jump 10 times, take slow breaths, tell someone why I am excited
 **Tired**	Yawning, grumpy, heavy eyes	Drink water, rest in a quiet spot, ask for a snack
	....	....

Who can I go to for help? ..... and .....
