BUILD THE SOLIDS

Name: ..... **Date:** .....

Two nets to cut out and fold. The cube becomes a 28 mm cube and the triangle becomes the smallest solid in the set. Count the faces before you fold: six for the cube, four for the pyramid.

Cube

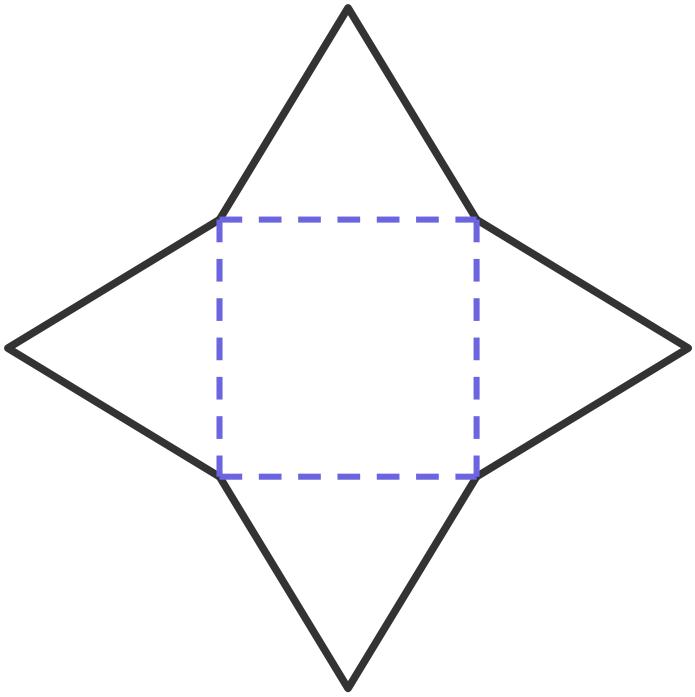

Triangular-based pyramid

Cut along the black lines. Fold every colored dashed line the same way, so the shape closes, and hold the joins with small pieces of tape. Build them on card for solids that last.

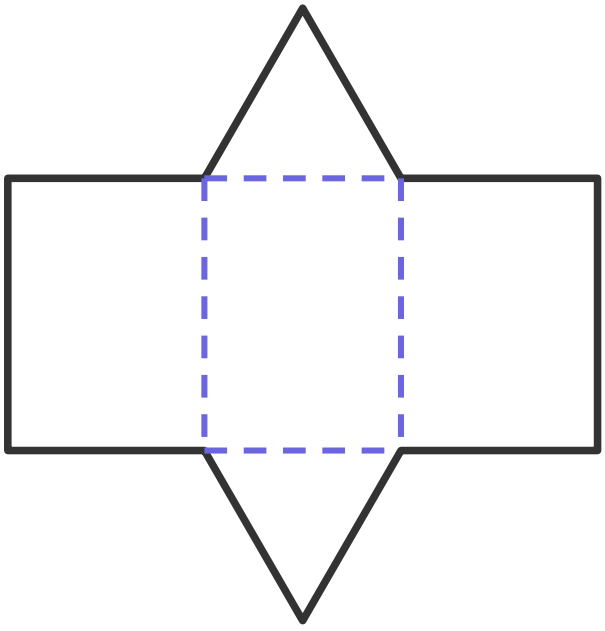

BUILD THE SOLIDS

Name: ..... **Date:** .....

Two more nets. The square-based pyramid has one square and four triangles; the triangular prism has two triangles and three rectangles. Press every fold with a fingernail before taping.

Square-based pyramid
