FIRST / THEN DATA SHEET

Name: _____ **Date:** _____

Twelve trials to go with the board, so you can tell whether it is working rather than guessing. Record the prompt you used, how long the child took to start, and whether they stayed with the work until the FIRST picture came off. Three sessions of this will show you whether the reward is strong enough.

Student _____ **Adult** _____ **Date** _____

Prompt key: **I** independent (board only) · **V** verbal · **G** gesture or point · **P** physical. Latency is the seconds between showing the board and the first move toward the work.

#	TIME	FIRST (THE WORK)	THEN (THE REWARD)	PROMPT I V G P	LATENCY (SEC)	STAYED TO THE END?

Trials with no prompt _____ **of 12**

Stayed to the end _____ **of 12**

Fewer than half of the trials finished? Make the FIRST smaller before you change the reward. Most boards fail because the demand was too big, not because the reward was too weak.
