LAND AND WATER FORMS

Name: ..... **Date:** .....

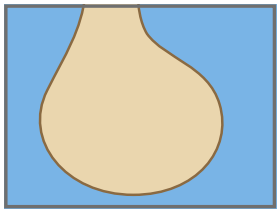

Six pairs, and each pair is one shape read two ways. Where the first picture has land, the second has water in the same place. Land is tan, water is blue.

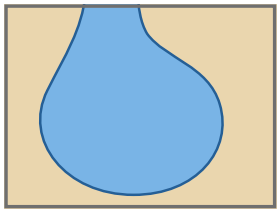

Island
A piece of land with water all around it.

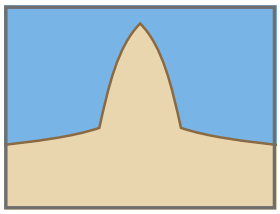

Lake
A body of water with land all around it.

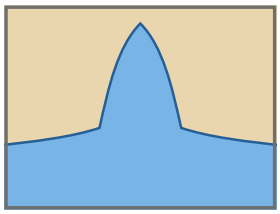

Peninsula
A piece of land almost surrounded by water, joined to more land on one side.

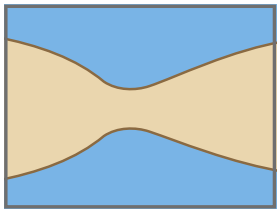

Gulf
A large body of water almost surrounded by land, with one wide opening.

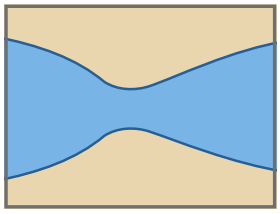

Cape
A point of land that reaches out into the water.

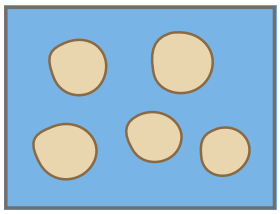

Bay
A part of the sea or a lake that curves into the land.

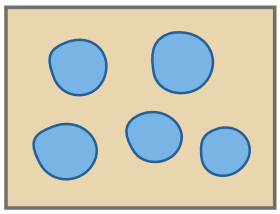

Isthmus
A narrow strip of land joining two larger pieces of land, water on both sides.

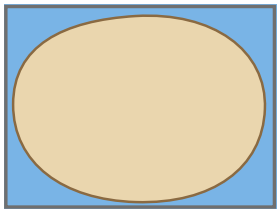

Strait
A narrow strip of water joining two larger bodies of water, land on both sides.

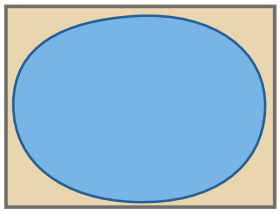

Archipelago
A group of islands in a large body of water.

System of lakes
A group of lakes in a large piece of land.

Continent
A very large piece of land with water all around it.

Ocean
A very large body of water with land all around it.

The first five pairs are the land and water form trays, presented one pair at a time from about age 4. Continent and ocean come last, with the land and water globe. Say the two names together every time: island and lake, peninsula and gulf.
