BLANK RACKS

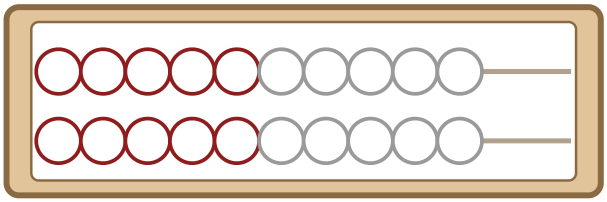

Name: ..... **Date:** .....

Six empty racks. An adult writes a number in each box, or the child picks their own, and then colors the beads to show it: red beads first, then white.

MAKE A REAL REKENREK IN TEN MINUTES

You need a shoebox lid or a piece of stiff card, two pipe cleaners and twenty beads: ten red and ten white, all the same size. Thread five red then five white onto one pipe cleaner and do the same with the second. Punch a hole at each end of the card, about 2 cm apart top to bottom, push the ends of the pipe cleaners through and twist them at the back. Push every bead to the right to start. The card has to be a little wider than ten beads so there is room to slide.

Keep the color order the same as the printed racks, five red then five white, or the five will stop being visible at a glance and the rack turns back into twenty things to count.
