BLANK CONTROL CARDS

Name: ..... **Date:** .....

Six blank control cards. Draw or glue a picture in the upper box and write the word in the lower box, then cut around the dashed line. The control card is the one the child checks against, so it is the only card with the picture and the word together.

Each picture box is 78 by 46 mm and each label box 78 by 15 mm. The blank picture cards and blank label cards on the next two sheets are cut to exactly those sizes, so a picture card laid on a control card covers the picture and nothing else. Print all three sheets on the same card stock.
