# FACES, EDGES, VERTICES

**Name:** ..... **Date:** .....

Count the flat faces, the curved surfaces, the edges and the vertices of each solid. Hold the real solid and touch each face as you count it, then write the number.

| Solid | Flat faces | Curved surfaces | Edges | Vertices |
|---|---|---|---|---|
|  **Sphere** | | | | |
|  **Cube** | | | | |
|  **Cuboid** | | | | |
|  **Cylinder** | | | | |
|  **Cone** | | | | |
|  **Triangular prism** | | | | |
|  **Square-based pyramid** | | | | |
|  **Triangular-based pyramid** | | | | |

A curved surface is not a flat face, so the sphere has none. The two circles of a cylinder are flat faces and the line around each circle is an edge. The point at the top of a cone is its one vertex.

# FACES, EDGES, VERTICES ANSWER KEY

Name: ..... Date: .....

Count the flat faces, the curved surfaces, the edges and the vertices of each solid. Hold the real solid and touch each face as you count it, then write the number.

| Solid | Flat faces | Curved surfaces | Edges | Vertices |
|---|---|---|---|---|
|  Sphere | 0 | 1 | 0 | 0 |
|  Cube | 6 | 0 | 12 | 8 |
|  Cuboid | 6 | 0 | 12 | 8 |
|  Cylinder | 2 | 1 | 2 | 0 |
|  Cone | 1 | 1 | 1 | 1 |
|  Triangular prism | 5 | 0 | 9 | 6 |
|  Square-based pyramid | 5 | 0 | 8 | 5 |
|  Triangular-based pyramid | 4 | 0 | 6 | 4 |

A curved surface is not a flat face, so the sphere has none. The two circles of a cylinder are flat faces and the line around each circle is an edge. The point at the top of a cone is its one vertex.
