BLANK PICTURE CARDS

Name: ..... **Date:** .....

Six blank picture cards, the same 78 by 46 mm as the picture box on the control card. Put the same picture here as on the matching control card: same drawing, same size, same position. No word goes on this card.

If you are photocopying a picture rather than drawing it, make the control card and the picture card from the same original so the two are identical. A child who notices that one picture is slightly bigger will match on size instead of on meaning, and the material stops teaching.
