A WEEK ON ONE GRAPH

Name: ..... **Date:** .....

Transfer the check-in numbers onto this grid, one dot per check-in, then join the dots. A line that climbs through the morning or peaks on the same day every week is the thing to act on.

Level	Mon			Tue			Wed			Thu			Fri		
Check-in	am	mid	pm	am	mid	pm	am	mid	pm	am	mid	pm	am	mid	pm
5 Out of control															
4 Very upset															
3 Upset															
2 A little bothered															
1 Calm															

STUDENT _____ WEEK OF _____ COMPLETED BY _____

Reading the graph. Count the check-ins at 4 and 5, and note what time of day they fall. Then look at the 1s and 2s: whatever was happening in those lessons is the thing to do more of. Three weeks of this graph is usually enough to show a team whether a plan is working, and it fits in a folder next to the data sheets.

MOST COMMON LEVEL	CHECK-INS AT 4 OR 5	HARDEST TIME OF DAY
