LEAF SET: CONTROL CARDS

Name: ..... **Date:** .....

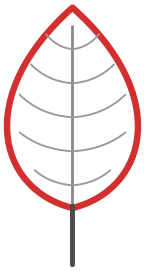

The six control cards for the first botany set, parts of a leaf. The named part is drawn in red on each card: blade, apex, margin, midrib, vein and petiole. Cut around the dashed lines and keep these six cards separate from the rest, because they are the answer.

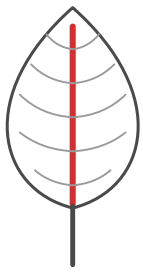

blade

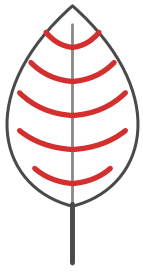

apex

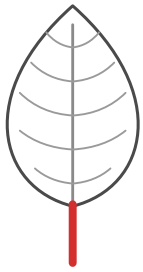

margin

midrib

vein

petiole

How the three periods work: lay the six picture cards out, then the six label cards, and let the child place each label under the picture it names. The control cards stay face down until the end; then the child turns them over one at a time and checks. Nothing is marked by an adult.
