TOKENS TO CUT OUT

Name: ..... **Date:** .....

Twenty-four tokens in four shapes: six stars, six circles, six squares and six hearts. Give each child their own shape so tokens never get mixed up or argued over at a shared table. Print on card, cut out, and color them in if a child likes that; the outlines are heavy enough to cut along after laminating.

A token has to be worth having. Tokens the child can fiddle with (a flat wooden disc, a magnet, a laminated star) work better than a drawn tick, because handing one over is a thing the child can feel.

Name .....

Cut around each token. Stick the soft side of a Velcro dot on the back so it holds on a laminated board.
