CUT AND SORT: 16 Y CARDS

Name: ..... **Date:** .....

Cut out the sixteen word cards and the four heading cards along the dashed lines. Say each word, decide which job the y is doing, and place the card under the heading. Four cards belong under each heading. None of these words appears on any other sheet.

Long i heading card	**Long e** heading card	**Short i** heading card	**Consonant y** heading card

WORD CARDS

hungry	**yell**	**deny**	**syrup**
youth	**jelly**	**Olympics**	**July**
cymbal	**pry**	**yogurt**	**berry**
yolk	**sleepy**	**reply**	**hymn**

Three of the long i cards have two syllables. July, reply and deny break the usual rule because the stress lands on the last syllable, so the y says long i and not long e. Say them both ways and keep the one that sounds like real speech.

CUT AND SORT: 16 Y CARDS ANSWER KEY

Name: ..... Date: .....

The four piles, four cards each.

Long i	Long e	Short i	Consonant y
pry	jelly	cymbal	yolk
deny	berry	syrup	yell
July	hungry	hymn	yogurt
reply	sleepy	Olympics	youth

Notes on the hard ones. **Pry** is a one-syllable word, so the y says long i; **July**, **reply** and **deny** have two syllables but the stress is on the last one, which keeps the long i. **Hymn** and **Olympics** keep the Greek pattern: y inside a syllable says short i, and the n of hymn is silent. **Yolk** and **youth** start with the consonant y even though they look like vowel sounds. **Hungry** and **sleepy** both have two syllables, so the y says long e.
