WIDE-FORMAT CARDS

Name: ..... **Date:** .....

Three landscape control cards, 160 by 44 mm of picture over a 160 by 14 mm label. A portrait box cuts the ends off a wide subject: a map, a whole insect from head to abdomen, a river from source to mouth, the parts of a fish. Print this sheet instead and the picture fits.

Three cards a page means two sheets for a set of six and a third for the picture cards, so a wide set costs more paper. Worth it when the picture is genuinely wide; not worth it for a leaf. Cut the matching picture cards from a second copy of this sheet, trimming off the label strip along the dashed divider.
