FACT FAMILIES: FIND THE MISSING NUMBER

Name: ..... **Date:** .....

One number in each fact family triangle is missing. If the top (the whole) is missing, add the two parts. If a part is missing, subtract the other part from the whole.

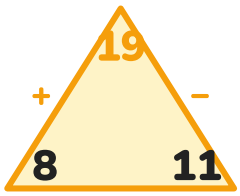

Worked example. Parts 6 and ?, whole 15: 15 − 6 = 9, so the missing part is 9. Parts 8 and 5, whole ?: 8 + 5 = 13.
