INTEGERS ON A NUMBER LINE

Name: ..... **Date:** .....

Integers are the whole numbers and their opposites. On a number line, numbers get bigger to the right and smaller to the left, so every negative number is smaller than every positive one.

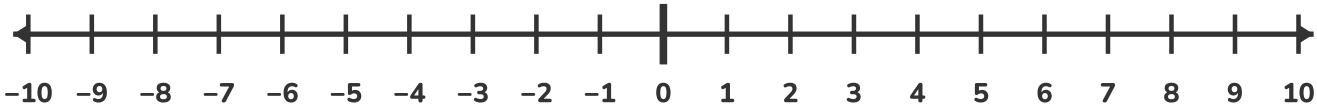

A. READ THE LETTERS

A = ☐ B = ☐ C = ☐ D = ☐ E = ☐ F = ☐

B. PLOT THESE INTEGERS: MARK AND LABEL EACH ONE

−9, −4, −1, 3, 7, 10

C. FILL IN THE MISSING LABELS

D. WHICH IS GREATER? CIRCLE IT

1. 3 8
2. −1 10
3. −4 −8
4. 0 4

Worked example: −7 or −2? On the line, −2 is to the right of −7, so **−2 is greater**. Being further from zero on the negative side makes a number smaller.

INTEGERS ON A NUMBER LINE ANSWER KEY

Name: ..... **Date:** .....

Answer key.

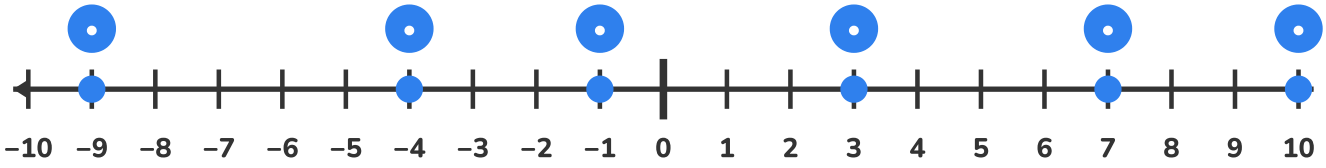

A. READ THE LETTERS

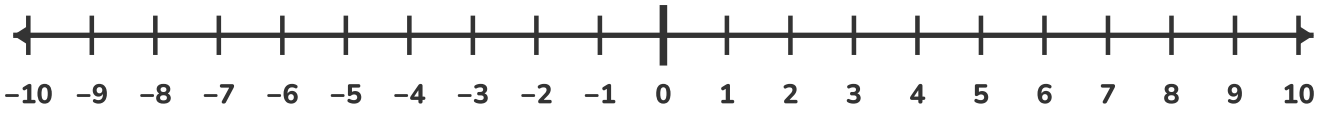

A = **−8** B = **−3** C = **2** D = **6** E = **−6** F = **9**

B. PLOT THESE INTEGERS: MARK AND LABEL EACH ONE

−9, −4, −1, 3, 7, 10

C. FILL IN THE MISSING LABELS

Missing labels: −7, −2, 4, 8

D. WHICH IS GREATER? CIRCLE IT

1.	3	**8**	2.	−1	**10**
3.	**−4**	−8	4.	0	**4**

Worked example: −7 or −2? On the line, −2 is to the right of −7, so **−2 is greater**. Being further from zero on the negative side makes a number smaller.
