COMPARE AND ORDER INTEGERS

Name: ..... **Date:** .....

Write <, > or = between each pair. Then order each set of five integers from least to greatest.
Remember: the negative number with the bigger digits is the smaller number.

1. 5 ☐ 20
2. −15 ☐ −20
3. 20 ☐ 15
4. 18 ☐ 5
5. 16 ☐ 0
6. −16 ☐ −3
7. −10 ☐ −7
8. −2 ☐ −5
9. −5 ☐ −18
10. 16 ☐ 13
11. 13 ☐ 14
12. 3 ☐ 2

ORDER FROM LEAST TO GREATEST

13. 16, 7, 11, 5, 2 → _____

14. 8, 16, 11, −11, 4 → _____

15. −7, −5, 20, −20, −13 → _____

16. −7, 8, 1, −12, 3 → _____

Worked example: −9 and −4: −9 is further left on the number line, so −9 < −4. Ordering 3, −5, 0, −1, 2 gives **−5, −1, 0, 2, 3**.

COMPARE AND ORDER INTEGERS

ANSWER KEY

Name: ..... **Date:** .....

Answer key.

1. $5 < 20$
2. $-15 > -20$
3. $20 > 15$
4. $18 > 5$
5. $16 > 0$
6. $-16 < -3$
7. $-10 < -7$
8. $-2 > -5$
9. $-5 > -18$
10. $16 > 13$
11. $13 < 14$
12. $3 > 2$

ORDER FROM LEAST TO GREATEST

13. 16, 7, 11, 5, 2 → **2, 5, 7, 11, 16**

14. 8, 16, 11, −11, 4 → **−11, 4, 8, 11, 16**

15. −7, −5, 20, −20, −13 → **−20, −13, −7, −5, 20**

16. −7, 8, 1, −12, 3 → **−12, −7, 1, 3, 8**

Worked example: −9 and −4: −9 is further left on the number line, so −9 < −4. Ordering 3, −5, 0, −1, 2 gives **−5, −1, 0, 2, 3**.
