Safe or unsafe?

Name: _____ Date: _____

Part 1: tick Safe or Unsafe for each action. Part 2: choose four unsafe actions from part 1 and write what the student should do instead.

PART 1: SAFE OR UNSAFE?

	Safe	Unsafe
1. Wearing safety goggles the whole time chemicals are out, even after you have finished your own experiment.	☐	☐
2. Tasting a tiny amount of a chemical to find out what it is.	☐	☐
3. Tying back long hair before lighting a Bunsen burner.	☐	☐
4. Pointing the open end of a test tube towards a classmate while heating it.	☐	☐
5. Reading the whole method before starting the experiment.	☐	☐
6. Eating your lunch at the lab bench because the lesson runs into break.	☐	☐
7. Wafting the air above a beaker towards your nose instead of sniffing it directly.	☐	☐
8. Pouring leftover chemical back into the stock bottle so it is not wasted.	☐	☐
9. Telling the teacher straight away when you break a beaker, even a small one.	☐	☐
10. Wearing open-toed sandals to the lab because it is a hot day.	☐	☐
11. Wiping up a small water spill on the floor immediately.	☐	☐
12. Mixing two leftover chemicals together to see what happens.	☐	☐
13. Carrying scissors and glass tubing with the points facing down.	☐	☐
14. Picking up broken glass with your fingers and dropping it in the normal bin.	☐	☐
15. Washing your hands before leaving the lab.	☐	☐
16. Leaving a lit Bunsen burner on a roaring blue flame while you fetch more equipment.	☐	☐

PART 2: FIX IT: WRITE THE SAFE VERSION

1. Tasting a chemical to identify it (item 2).

2. Pouring leftover chemical back into the stock bottle (item 8).

3. Picking up broken glass with your fingers (item 14).

4. Leaving a roaring blue flame unattended (item 16).

16. Unsafe

PART 2: FIX IT: WRITE THE SAFE VERSION

1. Never taste anything in the lab; read the label, or ask the teacher.

2. Put leftovers in the labelled waste container; never return them to the stock bottle, because they may be contaminated.

3. Warn others, use a dustpan and brush or tongs, and put the pieces in the broken-glass bin.

4. Turn the collar to the yellow safety flame, or turn the burner off, before stepping away from the bench.
