HAZARD SYMBOLS ANSWER KEY

Name: ..... **Date:** .....

PART 1: THE NINE HAZARD PICTOGRAMS

1. Flammable: catches fire easily; keep away from heat, sparks and flames
2. Toxic: can kill or cause serious harm if swallowed, breathed in or touched, even in small amounts
3. Corrosive: destroys skin, eyes and metals on contact (strong acids and alkalis)
4. Harmful or irritant: less serious health risk: irritates skin or eyes, or is harmful if swallowed
5. Oxidising: gives off oxygen and makes fires burn more fiercely
6. Gas under pressure: compressed gas in a cylinder; may explode if heated, and released gas can cause cold burns
7. Explosive: may explode if heated, struck or exposed to a spark
8. Health hazard: may cause long-term harm such as cancer, breathing problems or damage to organs
9. Hazardous to the environment: poisonous to fish and other living things; must not go down the drain

PART 2: WHICH SYMBOL WOULD YOU EXPECT ON THE LABEL?

1. flammable 2. corrosive 3. gas under pressure 4. toxic 5. explosive 6. hazardous to the environment (often also harmful or irritant)
