Safety equipment

Name: _____ **Date:** _____

INSTRUCTIONS: Part 1: draw a line from each piece of equipment to its job.
Part 2: walk around your lab with your teacher and record where each item is and when you would use it.

PART 1: WHAT DOES IT DO?

Column A	Column B
1. Safety goggles	a. Protects your skin and clothes from spills.
2. Lab coat or apron	b. Pulls harmful gases and vapours away so you do not breathe them in.
3. Tongs	c. Takes broken glass so nobody is cut by the normal rubbish.
4. Fume cupboard	d. Smothers a small fire, or burning clothing, by cutting off the oxygen.
5. Eyewash station	e. Puts out a small fire on a bench or the floor.
6. Fire blanket	f. Protects the bench from a hot tripod, gauze or crucible.
7. Fire extinguisher	g. Rinses a chemical out of your eyes for at least 15 minutes.
8. Heatproof mat	h. Protect your eyes from splashes, fumes and flying pieces.
9. Broken-glass bin	i. Hold hot or dangerous objects away from your hands.
10. Safety shower	j. Washes chemicals off a large area of skin or clothing quickly.

PART 2: WHERE IS IT IN OUR LAB?

Equipment	Where it is	When you would use it
Eyewash station		
Fire blanket		
Fire extinguisher		
First aid kit		
Fume cupboard		
Broken-glass bin		
Safety shower		
Gas shut-off valve		

For non-commercial, education use only

Safety equipment

PAGE 2 - ANSWER KEY: Safety equipment

PART 1: WHAT DOES IT DO?

Safety goggles = h

Lab coat or apron = a

Tongs = i

Fume cupboard = b

Eyewash station = g

Fire blanket = d

Fire extinguisher = e

Heatproof mat = f

Broken-glass bin = c

Safety shower = j

PART 2: WHERE IS IT IN OUR LAB?

Part 2 depends on your lab. Check that the "when" column names an emergency, not a routine task (the fume cupboard is the exception).
