TITLE THE PARAGRAPH

Name: ..... **Date:** .....

A good title tells the main idea in a few words, not just the topic and not one small detail. Read each paragraph and circle the best title.

1. Octopuses are clever escape artists. They can squeeze through any gap larger than their beak, the only hard part of their body. In aquariums, octopuses have unscrewed jar lids from the inside, slipped out of tanks at night and climbed into other tanks to eat the fish.

Best title: Fish in Aquariums | The Clever Octopus | Animals of the Sea

2. Before a big race, runners eat carefully. The night before, most eat pasta or rice so their muscles are full of energy. On race morning they eat something light, like toast and a banana, two hours before the start. Nobody tries a new food on race day.

Best title: How Runners Eat Before a Race | Pasta and Rice | Winning a Race

3. The Sahara is the largest hot desert on Earth. It stretches across eleven countries in North Africa and is almost as big as the United States. Days can reach 120 degrees, yet nights can drop below freezing. Rain may not fall for years in some places.

Best title: Hot Days and Cold Nights | Countries of Africa | The Sahara: The Largest Hot Desert

4. A library card is free, but it opens a lot of doors. With a card you can borrow books, movies and games, use the computers, join clubs and homework help, and download e-books without leaving home. Many libraries even lend museum passes and tools.

Best title: Free Books | What a Library Card Can Do | Downloading E-books

5. Ants find food by following smell trails. When one ant discovers a crumb, it walks home leaving a scent on the ground. Other ants follow the scent to the crumb and add their own scent on the way back. Soon a whole line of ants marches to the food.

Best title: How Ants Find Food | A Crumb on the Floor | Insects at Home
