BLANK SYMBOL SQUARES

Name: ..... **Date:** .....

Nine empty squares, each 2 inches across, which is the size the picture boxes on every board in this set are built for. Draw a symbol, glue in a photo, or write one word in large letters. Make two of each picture so one can live on the board and one can go in the choice folder.

Draw big and simple: one object, thick outline, no background. A child who cannot yet match a drawing to the real thing should get a photo of the actual item in your room instead.

Cut around each square, laminate, and stick the soft side of a Velcro dot on the back.
