HOW LONG A BREAK?

Name: ..... **Date:** .....

Two cards that turn a break into a number. The shaded wedge shows how much of an hour each break is, so a child who cannot read a clock can still see that ten minutes is longer than two. Set a visible timer to the number they circled and give the full time, even if they settle in thirty seconds.

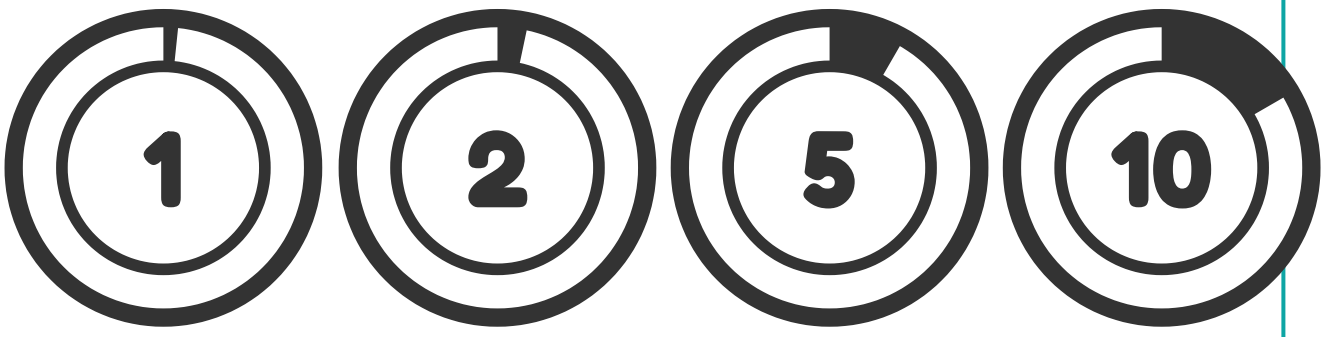

HOW LONG DO I NEED? CIRCLE ONE.

1 minute | 2 minutes | 5 minutes | 10 minutes

Start by offering the 5 and the 10. Once breaks are reliable, offer the 1 and the 2 as well, because the aim over a year is shorter breaks asked for sooner, not no breaks at all.

Cut the two cards apart. Laminate so the circling can be done with a dry-wipe pen.
