GRADE 3 WORD PROBLEMS: CHOOSE THE OPERATION

Name: _____ **Date:** _____

These problems mix all four operations. Read carefully, decide which operation the story needs, write the number sentence and solve.

Add: altogether, in total, sum, both, more

Subtract: left, fewer, difference, gave away, how many more

Multiply: each, per, groups of, rows of, times

Divide: shared equally, split, how many in each, how many groups

1. Omar has 63 baseball cards. He gives 19 to his brother. How many cards does Omar have now?

Answer: _____

2. A bakery makes 6 trays of muffins with 9 muffins on each tray. How many muffins is that?

Answer: _____

3. Lucy saved $27 in June and $38 in July. How much did she save altogether?

Answer: _____

4. There are 48 crayons shared equally by 8 children. How many crayons does each child get?

Answer: _____

5. A train has 7 cars. Each car carries 10 passengers. How many passengers can the train carry?

Answer: _____

6. A rope is 90 cm long. Zoe cuts off 36 cm. How long is the rope now?

Answer: _____

7. 32 students are going on a trip in vans that hold 8 students each. How many vans are needed?

Answer: _____

8. The school has 45 soccer balls and buys 28 more. How many soccer balls does it have?

Answer: _____

Worked example. 3 shelves of 9 books, then 5 books are taken out. 3 × 9 = 27, 27 − 5 = 22 books.

GRADE 3 WORD PROBLEMS: CHOOSE THE OPERATION ANSWER KEY

Name: ..... **Date:** .....

These problems mix all four operations. Read carefully, decide which operation the story needs, write the number sentence and solve.

Add: altogether, in total, sum, both, more

Subtract: left, fewer, difference, gave away, how many more

Multiply: each, per, groups of, rows of, times

Divide: shared equally, split, how many in each, how many groups

1. Omar has 63 baseball cards. He gives 19 to his brother. How many cards does Omar have now?

Answer: **63 – 19 = 44 cards (subtract)**

2. A bakery makes 6 trays of muffins with 9 muffins on each tray. How many muffins is that?

Answer: **6 × 9 = 54 muffins (multiply)**

3. Lucy saved $27 in June and $38 in July. How much did she save altogether?

Answer: **27 + 38 = $65 (add)**

4. There are 48 crayons shared equally by 8 children. How many crayons does each child get?

Answer: **48 ÷ 8 = 6 crayons (divide)**

5. A train has 7 cars. Each car carries 10 passengers. How many passengers can the train carry?

Answer: **7 × 10 = 70 passengers (multiply)**

6. A rope is 90 cm long. Zoe cuts off 36 cm. How long is the rope now?

Answer: **90 – 36 = 54 cm (subtract)**

7. 32 students are going on a trip in vans that hold 8 students each. How many vans are needed?

Answer: **32 ÷ 8 = 4 vans (divide)**

8. The school has 45 soccer balls and buys 28 more. How many soccer balls does it have?

Answer: **45 + 28 = 73 soccer balls (add)**

Worked example. 3 shelves of 9 books, then 5 books are taken out. 3 × 9 = 27, 27 – 5 = 22 books.
