SUBTRACTION STRIP BOARD

Name: ..... **Date:** .....

The subtraction board looks like the addition board, but the numbers you take away are covered. Lay the long natural strip from the right to hide everything past the first number, place a blue strip for the number you subtract, and read the answer at the end of the blue strip.

12 – 4:

= 8

The natural (wood-colored) strip covers 13 to 18; the blue 4 covers 9 to 12; the last number showing is 8.
