ADD FRACTIONS WITH CIRCLES

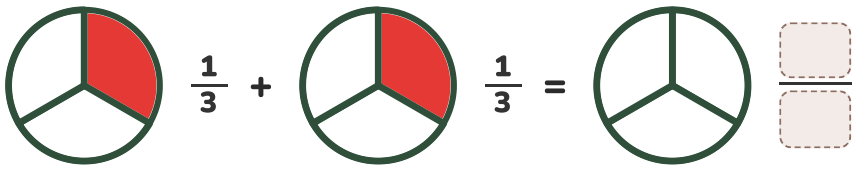

Name: _____ **Date:** _____

Both circles in a row are cut into the same number of pieces, so you can add the red pieces together. Color the answer circle with the total red pieces and write the fraction. The bottom number stays the same.

$\frac{1}{4} + \frac{2}{4} = \frac{\square}{\square}$

Color the answer circle, then write the fraction.

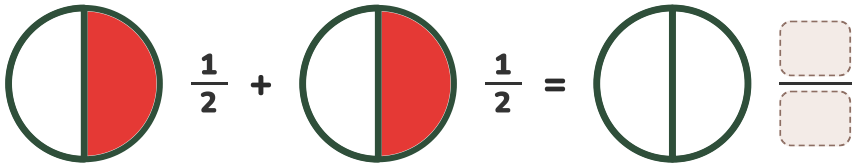

$\frac{1}{3} + \frac{1}{3} = \frac{\square}{\square}$

Color the answer circle, then write the fraction.

$\frac{2}{5} + \frac{2}{5} = \frac{\square}{\square}$

Color the answer circle, then write the fraction.

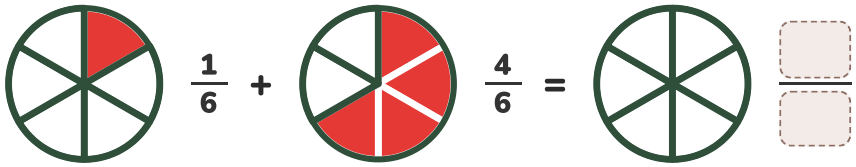

$\frac{1}{2} + \frac{1}{2} = \frac{\square}{\square}$

The answer is one whole.

$\frac{3}{8} + \frac{2}{8} = \frac{\square}{\square}$

Color the answer circle, then write the fraction.

$\frac{1}{6} + \frac{4}{6} = \frac{\square}{\square}$

Color the answer circle, then write the fraction.

$\frac{2}{7} + \frac{3}{7} = \frac{\square}{\square}$

Color the answer circle, then write the fraction.

$\frac{4}{10} + \frac{5}{10} = \frac{\square}{\square}$

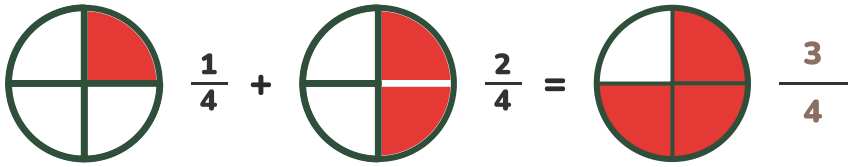

Color the answer circle, then write the fraction.

ADD FRACTIONS WITH CIRCLES

ANSWER KEY

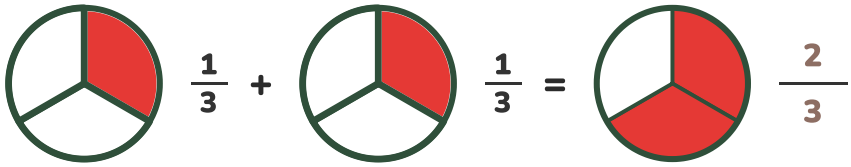

Name: ..... **Date:** .....

Both circles in a row are cut into the same number of pieces, so you can add the red pieces together. Color the answer circle with the total red pieces and write the fraction. The bottom number stays the same.

$\frac{1}{4} + \frac{2}{4} = \frac{3}{4}$

Color the answer circle, then write the fraction.

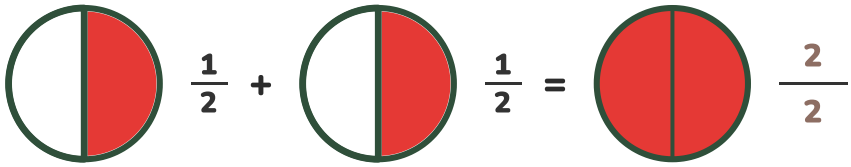

$\frac{1}{3} + \frac{1}{3} = \frac{2}{3}$

Color the answer circle, then write the fraction.

$\frac{2}{5} + \frac{2}{5} = \frac{4}{5}$

Color the answer circle, then write the fraction.

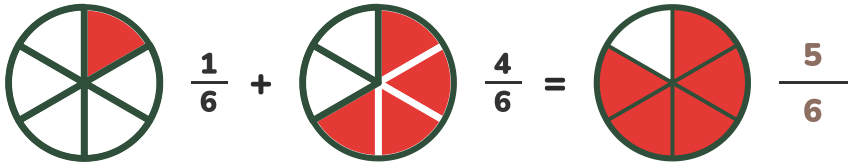

$\frac{1}{2} + \frac{1}{2} = \frac{2}{2}$

The answer is one whole.

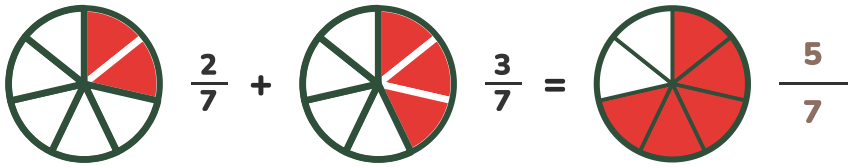

$\frac{3}{8} + \frac{2}{8} = \frac{5}{8}$

Color the answer circle, then write the fraction.

$\frac{1}{6} + \frac{4}{6} = \frac{5}{6}$

Color the answer circle, then write the fraction.

$\frac{2}{7} + \frac{3}{7} = \frac{5}{7}$

Color the answer circle, then write the fraction.

$\frac{4}{10} + \frac{5}{10} = \frac{9}{10}$

Color the answer circle, then write the fraction.
